

MWP Survey Form

This survey is here to help improve the current MWP/Flimsy Worksheet. Please explain any answers that you answered no to except for #5.

1. Do you agree with the time block of the current MWP during the period of forecast (ex. 15-19Z for point location, 15-21Z for zonal locations/enroute, etc.) or should they be changed?

2. Do you use the current forecasted locations on the current MWP for flying and planning purposes?

3. Does the current MWP cover important weather thresholds for your aircraft?

4. Is the WWAs (Watches, Warnings & Advisories) and Solar/Lunar Data portion easy to understand?

5. Any other suggestions on how to improve the current MEF Worksheet?
